### Re: 3300 Series Leak Test System

Sciometric is announcing the discontinuation of the 3300 Series Leak Test System, which was used only in niche applications. With the release of the new 3520 Series and turnkey Model 3670 leak test station, customers can now address a range of leak test requirements with one product family.

The intent of this notice to inform our valued customers of the discontinuation and extend an opportunity for last time buy to meet your requirements.

### Key Dates

|   |                                    |
|---|------------------------------------|
| Product Discontinuation Notice                    | Effective immediately              |
| Last Time Buy (date for last order acceptance)    | <b>January 30, 2015</b>            |
| Warranty Support until                            | <b>As per Terms and Conditions</b> |
| Technical Support (on a best efforts basis) until | <b>January 30, 2016</b>            |

### Alternative Product Options

The new 3520 Series Leak Test Modules offer versatility for a range of leak test applications while using the latest technology to deliver new levels of speed and accuracy. The 3520 offers industry-leading temperature compensation and are easy to service and maintain. Manage up to four units with a single controller. [Click here for the datasheet.](#)

For a turnkey solution, integrate up to four 3520 Series modules into the Model 3670 Leak Test Station [Click here to review the specifications for the standard Model 3670.](#) Custom options are also available.

### More Information
