

Product Discontinuation Notice

QualityWorX ERP Bridge

December 29, 2015

Re: QualityWorX ERP Bridge

The ERP Bridge was developed in 2009 to allow QualityWorX-enabled enterprises to share data with their ERP systems. Since then, optimizations to the QualityWorX database and the creation of new connectors and data retrieval and insertion APIs have resulted in the obsolescence of the ERP Bridge, which is being discontinued effective immediately.

The discontinuation means that no further development of the ERP Bridge, including bug fixes, updates or new releases, will be undertaken.

Options for Connecting to ERP Systems

The QualityWorX product line features a range of software-based connectors for collecting and retrieving production data from the QualityWorX as well as for inserting it into other systems. Customizable APIs are also available. Contact us to discuss your ERP data connection requirements for a specific recommendation.

Key Dates

Product Discontinuation	Effective immediately
Technical Support (on a best effort basis)	Contact Sciometric*

** Service fees may apply. Depending upon the issue, moving to another connector may be recommended.*
